

Departmental activities for 2026 of Department of Zoology

Sl. No.	Date	Name of Event	No. of Participants
1	29.01.2026	Study of Protistan Diversity	06
2	13.02.2026	Campus Bird Diversity Study as part of GBBC	28
3	24.08.2026	Fresher's Welcome "ZOEА"	30
4	01.09.2026	Limnology for All	22
5	08.09.2026	Teachers' Day Celebration	30

Department in Motion: Academic Milestones & Student Life in 2026

The year 2026 continues to be a vibrant and action-packed journey for our department, driven by curiosity, active field research, and dynamic student community building. Balancing hands-on biological sciences with meaningful campus traditions, our faculty and students have maintained an inspiring momentum across the semesters:

- **Study of Protistan Diversity (January 29, 2026):** Immersive laboratory and microscopy work examining microscopic aquatic life, setting a rigorous academic tone for the year.
- **Campus Bird Diversity Study – GBBC 2026 (February 13, 2026):** Active participation in the global Great Backyard Bird Count citizen science initiative, documenting and monitoring our local avian biodiversity.
- **Fresher's Welcome "ZOEА" (August 24, 2026):** An enthusiastic gathering welcoming our newest academic batch into the departmental fold with creative energy and cultural camaraderie.
- **"Limnology for All" (September 1, 2026):** An outreach-oriented academic initiative focused on freshwater ecology, water monitoring techniques and experiential learning.
- **Teachers' Day Celebration (September 8, 2026):** A heartwarming day honouring faculty mentorship, academic guidance and shared department milestones.

With the academic session in full swing, we remain on a constant move, committed to expanding scientific outreach, nurturing student leadership and sustaining our shared passion for biological sciences. Stay tuned as more initiatives, field explorations and workshops unfold in the coming months!
